

## COVID-19 Impact and Implementation Survey Executive Summary

Dear Members,

Industry Insights built a COVID-19 Impact & Implementation survey to help our members understand the overall sentiment and action plans of their peers, and to help us assist our members during this global pandemic.

In these unprecedented times, knowledge-sharing of members' experiences and the ways they are combatting operational disruptions can be essential to their sustainability and longevity.

Attached are the results of the COVID-19 Survey from last week. In all, 25 client associations took part, and 2500+ responses from companies were received in various industries.

A big thank you to Michael Becher, Vice President of Industry Insights, Inc., for sharing with us so that we could share with you.
