

Championing

U.S. Based

Manufacturing

Built Local. Backed by NEMRA.

"Built Local. Backed by NEMRA." is more than a campaign, it's our commitment to championing the manufacturers in our network who are investing in the future of American industry. From small batch facilities to expansive production campuses, these U.S.-based operations fuel job creation, spark innovation, and strengthen local communities.

This campaign is designed to shine a spotlight on the companies building and expanding their presence here at home. Whether a manufacturer is launching a new facility, upgrading existing operations, or relocating production to U.S. soil, their investment in domestic manufacturing strengthens the entire electrical channel.

Why Local

Driving progress through local innovation

Creating skilled, well-paying U.S. jobs

Strengthening supply chains and delivery speed

Investing in community growth

These stories aren't just updates, they're proof points of what's possible when companies commit to making an impact at home.

Who We're Featuring

Throughout this campaign, we'll spotlight manufacturers of all sizes who are growing U.S.-based operations. Each feature will showcase their visionary leadership, strategic growth, community partnerships, and collaboration with NEMRA representatives.

Get Involved

Together, the NEMRA network can amplify this mission.
