

FLOW RSM + FLOW CONNECT

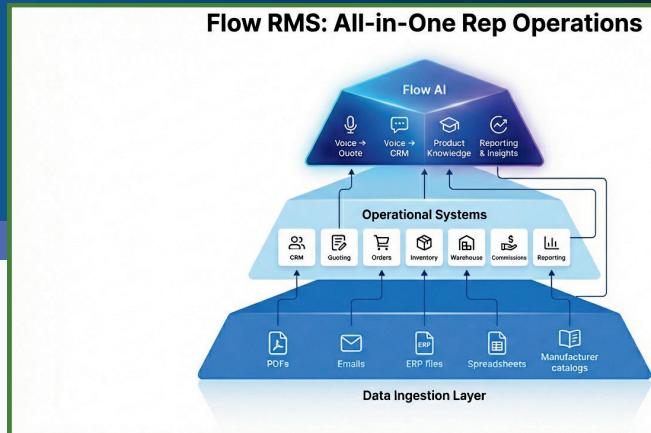

AI-First Operations & Coordination ERP Platform

Flow gives NEMRA Lighting reps faster quotes, protected commissions, and instant product answers by connecting every partner and automating the work behind each project.

FlowConnect: Industry Coordination at Scale

Flow RMS: All-in-One Rep Operations

One Software for Everything Manufacturing Reps Do

- ✓ **AI-Native Operations for Rep Firms** – Purpose-built for lighting, electrical, HVAC, and industrial reps – with AI at the core.
- ✓ **Zero-Click CRM & Automation** – Log notes, tasks, quotes, emails, and insights by voice or text. Eliminate manual entry across CRM, quoting, orders, commissions, and reporting.
- ✓ **Universal Product Knowledge & Cross-References** – Ingest all manufacturer catalogs into one product map. FLOWBot answers specs, warranties, technical requirements, competitive equivalents, and VE/cross-references instantly.
- ✓ **Lighting Project Takeoffs** – Upload fixture schedules or plan sets. FLOW identifies fixture attributes, maps to SKUs, builds BOMs, generates VE options, alternates, and competitive comparisons—quote-ready.
- ✓ **Commission Tracking & Revenue Recovery** – Monitors quotes → orders → invoices → payments. Flags missed/underpaid commissions and recovers lost revenue.
- ✓ **Smart Lighting Workflows** – Automates quote → order → invoice → commission flows. Handles splits, overages, branded docs, approval processes, VE packages, and multi-line lighting projects.
- ✓ **Dashboards & Insights** – Real-time, customizable views of sales, commissions, rep activity, product trends, and channel insights for all roles.

The Industry-Wide Coordination Platform

Flow Connect is the private network for rep firms, lighting manufacturers, and distributors—where projects, quotes, and campaigns run end-to-end.

Key Capabilities

- Territory Signals: Targeted RFPs, awards, and regulatory intel matched to your lines.
- Spec → Takeoff → Quote: Extracts spec book lines, runs crosses, builds quotes in one workflow.
- Built-In Collaboration: Threads tied directly to projects, quotes, and catalog items.
- Universal Product Hub: Network-wide catalog standardized with ETIM/HDM/USPAC.
- Seamless Data Flows: Quotes, orders, invoices, POS, and commissions move via Data Pipes (API/EDI/CSV) while partners keep their own systems.
- Campaign Engine: Manufacturers and reps launch campaigns to the entire rep network with assets and analytics.
- Network Effects: More reps/manufacturers → more projects, visibility, and cross-opportunity.
